

1. Team information and Team Agreement report.

- Team name: The Learning layers
- Team members: List all the members of your team.
 - Oluwadabira Omotoso (84518448)
 - Afua Frempong (90434176)
 - Karim Khalil (38485272)
 - Atharva Jagtap (39283783)
 - Peter Idoko(89385496)
- Team agreement: The team agreement is a contract that all team members sign up to. It should detail the expectations each team has for its members:
 - *2 times a week (45 mins in-person on Monday , 15 mins zoom on Saturday) .*
 - *Git/issue tracker/test strategies.*
 - *During the second 15 min zoom meeting we will each first pull then push our work then test them one at a time making sure each functionality is working as intended.*
 - *Each member has a task each week and would meet the deadline for finishing up their task*
 - *Communicating any problems and not missing two consecutive meetings*
- List the project's preference: E-learning platform
- List the Lab Section preference: L12 (Wednesday 4-6)

2. Planning Framework

- Set up your team's Github repository. Your repo name should be your team's name.
- Add the URL of your repo in this submission (Canvas):
<https://github.com/dabby04/TheLearningLayers>
- Create a folder in the repo, called "Scrum meetings", and add all the templates for all the weeks. Fill the template for the first week after your team has the first scrum meeting.
- Create your product backlog and sprint backlog using the Kanban dashboard offered by GitHub.
